

117TH CONGRESS
1ST SESSION

H. RES. 245

Calling for renewed, decisive, and robust international collaboration and coordination to fight COVID–19 across Africa.

IN THE HOUSE OF REPRESENTATIVES

MARCH 17, 2021

Ms. BASS (for herself, Ms. NORTON, Mr. BISHOP of Georgia, Mr. RUSH, Ms. JACKSON LEE, Mr. SHERMAN, Mr. BUTTERFIELD, Mr. SIRES, Mr. JOHNSON of Georgia, Mr. HASTINGS, Ms. TITUS, Mr. CICILLINE, Mr. BERNA, Mr. VARGAS, Mr. CASTRO of Texas, Mr. CONNOLLY, Mrs. LAWRENCE, Mr. EVANS, Mr. SUOZZI, Mr. MORELLE, Mr. BROWN, Mr. KHANNA, Ms. PRESSLEY, Ms. OMAR, Mr. MALINOWSKI, Mr. NEGUSE, and Ms. JACOBS of California) submitted the following resolution; which was referred to the Committee on Foreign Affairs

RESOLUTION

Calling for renewed, decisive, and robust international collaboration and coordination to fight COVID–19 across Africa.

Whereas the World Health Organization (WHO) declared COVID–19 a pandemic on March 11, 2020, and by the end of that month, the virus had infected more than 500,000 people and killed nearly 30,000;

Whereas the first COVID–19 case on the African continent was recorded on February 14, 2020, in Egypt, and as of May 2020, the WHO’s modeling predicted that if containment measures failed, 29,000,000 to 44,000,000 Af-

ricans could be infected in the first year of the pandemic, with 83,000 to 190,000 deaths;

Whereas, in early October 2020, a new COVID–19 variant was first detected in Nelson Mandela Bay, South Africa, and as of February 1, 2021, the South Africa variant had spread rapidly around the globe, including to the United States;

Whereas COVID–19 is highlighting how interconnected our social, economic, and environmental challenges are, and the United States will not fully emerge from the pandemic until COVID–19 has been contained worldwide, including in Africa;

Whereas leaders across Africa acted swiftly in response to the early spread of COVID–19 cases, repurposing existing health protocols and tools from previous epidemic outbreaks to fight COVID–19;

Whereas the Africa Centres for Disease Control and Prevention (Africa CDC) warned that shortages of health care professionals in African countries would devastate already fragile health care systems that are unable to meet the unprecedented demands of the COVID–19 pandemic;

Whereas African countries have exhibited varying COVID–19 infection rates and responses, and different testing practices and capabilities among the continent have likely contributed to significant underreporting of COVID–19 confirmed cases and fatalities;

Whereas, as of February 2021, South Africa had reported more than 1,460,000 cases (roughly 40 percent of the total African continent's reported COVID–19 cases) and more than 49,000 COVID–19 related deaths (roughly 48

percent of the African continent's reported COVID–19 deaths);

Whereas across the African continent, COVID–19 has compounded existing education challenges, as schools have closed while limited access to electricity and technological gaps have hindered distance learning;

Whereas responses to COVID–19 by some African governments have raised concerns about democratic backsliding, with some countries postponing elections and violently cracking down on citizens accused of violating lockdown orders;

Whereas according to the WHO, women and girls in Africa are likely to be the hardest hit by health, social, and economic consequences of COVID–19, and women and girls may face a “shadow pandemic” of domestic violence, forcing large numbers of girls into early marriage and resulting in increased sexual violence and higher rates of unplanned pregnancies;

Whereas the WHO and the United Nations International Children’s Emergency Fund have warned of an alarming decline in the number of children receiving lifesaving vaccines in Africa and elsewhere around the world, and social distancing and lockdowns to control the spread of COVID–19 have disrupted vaccination campaigns, as well as prevention and treatment programs, including those to treat and prevent HIV, tuberculosis, and malaria;

Whereas aid disruptions and rising food prices linked to the COVID–19 crisis are increasing the needs and vulnerabilities of refugees and internally displaced people across Africa, leading to even greater food insecurity for millions;

Whereas the World Food Programme estimated that in Burkina Faso, Mali, and Niger, food insecurity rose by 1,000,000 to 4,800,000 since the start of the COVID–19 pandemic, and ongoing conflicts, mass displacement, droughts, and locust infestations have further contributed to severe food insecurity in parts of Africa;

Whereas Africa’s youth are playing a crucial role to help their communities by fighting misinformation and leading campaigns to fight COVID–19; for example, in Nigeria, a young man disseminated accurate information about the pandemic in more than 60 local languages, and in the eastern Democratic Republic of the Congo, youth activists went door-to-door distributing informational pamphlets on how to stop the spread of COVID–19;

Whereas many migrants and their families rely on remittances as a source of income, and the Brookings Institution reports that remittance to Sub-Saharan Africa will decline by 5.8 percent to \$41,000,000,000 in 2021 compared to \$44,000,000,000 in 2020 and \$48,000,000,000 in 2019; and

Whereas there is a need for a renewed, strategic, and focused approach to United States policy toward Africa, and by focusing United States efforts, working respectfully with our allies, strategic partners, and other stakeholders, and mitigating future economic and security impacts stemming from COVID–19, the United States can protect Africa and the rest of the world’s health economic security:

Now, therefore, be it

- 1 *Resolved*, That the House of Representatives—

1 (1) reaffirms that decreasing the spread of
2 COVID–19 in Africa is in the national interest of
3 the United States;

4 (2) commends the heroic work of Africa’s front-
5 line health workers to keep the continent and the
6 world safe;

7 (3) calls on the international community to en-
8 sure equitable global distribution of personal protec-
9 tive equipment to keep African health care workers
10 safe;

11 (4) urges the G–20 members, including the
12 United States Government, to—

13 (A) renew their global public investments
14 and efforts to develop and distribute thera-
15 peutics and vaccines to address COVID–19 and
16 prevent further deaths, and for other global
17 health purposes, including continued support
18 for the GAVI Alliance and the Global Fund,
19 multilateral funding institutions, civil society,
20 and new global collaboration initiatives, such as
21 the Access to COVID–19 Tools ACT-Accel-
22 erator and the COVAX facility;

23 (B) increase contributions to concessional
24 lending facilities managed by the International
25 Monetary Fund to support implementation of

1 COVID–19 containment measures and provide
2 liquidity to African countries over the next 2
3 years;

4 (C) amend national remittance plans to cut
5 the cost of remittance fees to close to zero and
6 ensure remittance costs do not exceed the 3
7 percent called for in the United Nations Sus-
8 tainable Development Goals; and

9 (D) continue to support efforts, such as
10 the G–20’s Debt Service Standstill Initiative to
11 finance debt standstill for African countries, to
12 be followed by fair, transparent, and com-
13 prehensive debt restructuring to free up re-
14 sources to respond to the pandemic and its fall-
15 out;

16 (5) calls on the United States Government aid
17 recipients and donor countries to renew the global
18 fight against hunger, including by contributing to
19 the World Food Program appeal to raise
20 \$6,800,000,000 by April 2021 to avert famine dur-
21 ing the COVID–19 crisis;

22 (6) encourages the United States, other donor
23 governments, the United Nations, nongovernmental
24 organizations, and other stakeholders to—

1 (A) maintain or increase support to Afri-
2 can governments' responses to COVID–19, in-
3 cluding their country-specific actionable na-
4 tional deployment and vaccination plans, and to
5 support efforts by the Africa Centres for Dis-
6 ease Control and Prevention (Africa CDC) and
7 the African Union (AU);

8 (B) align humanitarian, peacebuilding, and
9 development efforts in Africa to respond more
10 effectively and efficiently as COVID–19 exacer-
11 bates conditions and drains precious resources;
12 and

13 (C) increase programming flexibilities,
14 meaningfully engage local organizations, and
15 adopt country-specific approaches to fight
16 COVID–19 by recognizing the unique needs
17 and challenges and enormous size and diversity
18 of the African continent;

19 (7) urges the United States Government to—

20 (A) partner with the AU to ensure that
21 United States Government assistance is aligned
22 with the goals of the AU's and Africa CDC's
23 Africa Task Force for Coronavirus to bolster
24 the continentwide COVID–19 recovery re-
25 sponse; and

1 to information, health care, and other necessities; and

3 (B) actively incorporate the United Nations Office of the High Commissioner for Human Rights and the AU's joint guidance entitled "Seven Possible Actions—Women's Rights and COVID–19" into their COVID–19 response plans; and

9 (11) encourages African governments, as part of COVID–19 response efforts, to implement inclusive development planning and policymaking that includes open, participatory, and transparent budgeting processes to allow citizens to participate in and monitor budget development and implementation, and to implement procurement, contract, and beneficial ownership transparency to ensure the accountable and effective use of COVID–19 emergency funds.
